

Let us honor the legacy of this great man who fought for the freedom of those who refused to do the same.

RISING ENERGY PRICES

(Mr. JOYCE of Pennsylvania asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JOYCE of Pennsylvania. Madam Speaker, last week, I heard from a woman in my district who told me about the direct impact that rising energy prices are having on her family. This year, her energy bill will climb from \$135 to \$398 a month.

This constituent is not alone, and because of this record-setting inflation, two-thirds of Americans have been forced to use their savings just to pay for everyday expenses.

With gas now costing more than \$5 a gallon, with diesel costs up nearly 70 percent higher than they were a year ago, it is Pennsylvania families who are now paying the price for President Biden's failed energy policies.

Instead of using American energy, President Biden is preparing to travel to Saudi Arabia in an attempt to bring more foreign oil into our markets here in America.

Americans cannot afford these record-setting prices, and we cannot afford to allow the Biden administration to continue its war on American energy.

ALZHEIMER'S AND BRAIN AWARENESS MONTH

(Mr. WILSON of South Carolina asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILSON of South Carolina. Madam Speaker, June is Alzheimer's and Brain Awareness Month, a time to raise the level of attention to debilitating dementias.

I appreciate the dedication of Taylor Wilson, the Director of Government Affairs for the Alzheimer's Association of South Carolina.

Alzheimer's is a brain disorder which slowly destroys memory and thinking skills. It is not a normal part of aging but a result of complex changes in the brain that start years before symptoms appear.

I am grateful for the Lexington Medical Center Carroll Campbell Place, in loving memory of former and late Governor Carroll Campbell.

According to the Centers for Disease Control, there are nearly 6 million people in the U.S. that have Alzheimer's and related dementias. We honor those families in America facing a dementia diagnosis, while supporting the hope of all that through research, we can find a prevention or treatment for this fatal disease.

In conclusion, God bless our troops who successfully protected America for 20 years in the global war on terrorism as it continues moving from the Afghanistan safe haven to America.

RECOGNIZING CRANBERRY HIGH SCHOOL AND MIDDLE SCHOOL ROBOTICS TEAMS

(Mr. THOMPSON of Pennsylvania asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. THOMPSON of Pennsylvania. Madam Speaker, I rise today to congratulate Cranberry High School and Middle School robotics teams from Venango County, Pennsylvania's 15th Congressional District.

Cranberry High School sent 19 students and 2 teachers to Dallas, Texas, to compete in the 2022 VEX Robotics World Championship in May. While in Dallas, Cranberry High School teams competed against more than 800 other teams from around the country and the world.

When it came time to compete, each team was paired randomly with another team to showdown against two other randomly paired teams. Each team participated in 10 2-minute rounds throughout the tournament.

To win, each team's robot had to coordinate with their allied team's robot to complete certain tasks in the rink before their opponents did. This required each team to work together with a team of strangers, sometimes from another country.

This opportunity allowed Cranberry High and Middle School students to broaden their horizons, as well as explore future careers in the robotics and engineering fields.

Congratulations to the 19 students who participated in such a great event.

HONORING THE LEGACY OF WILMA MANKILLER

(Mrs. BICE of Oklahoma asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BICE of Oklahoma. Madam Speaker, I rise today to celebrate the release of the third coin in the American Women Quarters Program which features Oklahoma's own Wilma Mankiller.

Ms. Mankiller lived an inspiring life, which has had a lasting impact on Oklahoma and beyond. Hailing from the Cherokee Nation, she was hired as an economic stimulus coordinator and founded the community development department.

Through her incredible work, she became the first woman elected as Principal Chief of the Cherokee Nation. Under her leadership, she revitalized the Tribe's economy, education systems, and health and well-being programs.

Her remarkable leadership made the Cherokee Tribe a national role model, but she didn't stop there. After leaving office, she remained an advocate for women across the globe. She received the Presidential Medal of Freedom, the highest honor given to civilians in the U.S., and was inducted into the National Women's Hall of Fame.

Ms. Mankiller's commitment to bettering her community and society as a whole is truly inspiring. May her legacy continue to live on forever.

WORLDWIDE UREA SHORTAGE

(Mr. LAMALFA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAMALFA. Madam Speaker, it is no secret that America is facing many crises today, most unnecessary, on the border, fuel, inflation, even baby formula shortages.

But one thing that is not being talked about a lot is that we have a worldwide shortage of urea, which is a component in fertilizer, as well as fluid called DEF used in diesel engines for trucks, tractors, et cetera, made after 2010.

It is very important that we have this essential element because if we don't have our trucks and tractors and even trains running, then we are going to have even bigger supply crises than what we have now.

China and Russia are two of the major exporters of this urea product, and they are actually cutting their exports of them in order to take care of themselves.

What we need to do in this country is step up our own production once again. After Hurricane Ida—down on the Gulf Coast a few years ago—caused suspension of operations of some of these plants that we have, we have to get it back going again because we need urea for our fertilizer to continue to grow food and to have our diesel engines that require DEF, the diesel exhaust fluid, to keep going and deliver the items we need.

Why do we need yet another crisis of running out and messing up the supply chain?

CONTINUATION OF THE 340B PROGRAM

(Mr. BERGMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BERGMAN. Madam Speaker, I rise today to highlight the positive accomplishments and ongoing challenges facing healthcare providers in rural and remote parts of our country, especially in places like Michigan's First District, my home.

Last week marked the 30th anniversary of the 340B Federal drug pricing program, which provides discounted pharmaceutical products to providers that care for a disproportionate share of uninsured and at-risk patients.

In my district alone, we have 20 340B hospitals providing care for our most vulnerable patient populations and ensuring our rural and remote communities receive the best possible care available.

This program has been a critical component of healthcare for so many
